

Forms and Report Design

1. Introduction

This document presents the Forms and Report Design for the Laundry Shop Management System. It defines the system's input forms and output reports, specifying the data elements involved, their sources, validation rules, and destinations.

This deliverable bridges the gap between:

- Data Design (ERD and Data Dictionary), and
- User Interface Design (Prototype 1)

ensuring that all required data is properly captured, processed, and presented.

2. Purpose of Forms and Report Design

The objectives of this document are to:

- Identify all system input forms required to support business processes
- Define data fields, formats, and validation rules
- Specify all system-generated reports
- Ensure traceability between requirements, data design, and user interfaces
- Provide a clear basis for system implementation

3. Forms Design (Input Design)

3.1. General Form Design Principles

All forms follow these principles:

- Simple and user-friendly layout
- Mandatory fields clearly identified

- Input validation enforced where applicable
- Data captured corresponds directly to ERD entities
- Forms are accessible only to authorized users (Staff / Owner)

3.2. Login Form

Form Name: Login Form

Purpose: Authenticate system users before granting access

Source: Staff / Owner

Destination: User entity

Output: Access Result (success / error)

Field Name	Description	Data Type	Required	Validation Rules
username	User login name	VARCHAR	Yes	Must exist in User table
password	User password	VARCHAR	Yes	Must match stored hash

3.3. Laundry Order Entry Form

Form Name: Laundry Order Entry Form

Purpose: Record new laundry orders

Source: Staff

Destination: Customer, LaundryOrder entities

Output: Order Reference Number, confirmation message

Field Name	Description	Data Type	Required	Validation Rules
customer_name	Customer full name	VARCHAR	Yes	Cannot be empty
contact_number	Customer contact number	VARCHAR	Yes	Valid phone format

Laundry Shop Management System | Forms and Report Design

service_type	Type of laundry service	ENUM	Yes	Wash / Dry / Fold / Iron
weight_kg	Laundry weight	DECIMAL	Yes	Must be > 0
special_items	Special notes	VARCHAR	No	Optional
total_amount	Total service cost	DECIMAL	Yes	Must be ≥ 0

3.4. Laundry Status Update Form

Form Name: Laundry Status Update Form

Purpose: Update and track the status of laundry orders

Source: Staff

Destination: LaundryOrder entity

Output: Updated order status

Field Name	Description	Data Type	Required	Validation Rules
order_reference	Order reference number	VARCHAR	Yes	Must exist
order_status	Current laundry status	ENUM	Yes	Received / Processing / Ready / Released

3.5. Payment Entry Form

Form Name: Payment Entry Form

Purpose: Record customer payment for laundry orders

Source: Staff

Destination: Payment, LaundryOrder entities

Output: Payment confirmation, updated payment status

Field Name	Description	Data Type	Required	Validation Rules
order_reference	Order reference number	VARCHAR	Yes	Must exist
payment_amount	Amount paid	DECIMAL	Yes	Must equal total amount
payment_date	Date of payment	DATE	Yes	Valid date

3.6. Laundry Release Verification Form

- Form Name: Laundry Release Form
- Purpose: Verify and release completed laundry orders
- Source: Staff
- Destination: LaundryOrder entity
- Output: Release confirmation or error message

Field Name	Description	Data Type	Required	Validation Rules
order_reference	Order reference number	VARCHAR	Yes	Must exist
order_status	Laundry readiness	ENUM	System-generated	Must be “Ready”
payment_status	Payment verification	ENUM	System-generated	Must be “Paid”

4. Report Design (Output Design)

4.1. General Report Design Principles

- All reports:
- Are accessible only to authorized users (Owner)
 - Are generated based on selected parameters
 - Present data in a clear tabular format
 - Support decision-making and monitoring

4.2. Daily Sales Report

- Report Name: Daily Sales Report

Purpose: Display total sales for a selected day

Source Tables: LaundryOrder, Payment

Output: Total daily sales summary

Parameters:

- Date

Field Displayed	Description
Order Reference	Laundry order identifier
Customer Name	Name of customer
Payment Amount	Amount paid
Payment Date	Date of transaction

4.3. Monthly Income Report

Report Name: Monthly Income Report

Purpose: Summarize total income for a selected month

Source Tables: LaundryOrder, Payment

Output: Monthly total income

Parameters:

- Month
- Year

Field Displayed	Description
Order Reference	Laundry order identifier
Payment Amount	Amount paid
Payment Date	Date of transaction

4.4. Pending Laundry Orders Report

Report Name: Pending Orders Report

Purpose: Identify laundry orders that are not yet released

Source Tables: LaundryOrder, Customer

Output: List of pending orders

Parameters:

- Optional date range

Field Displayed	Description
Order Reference	Laundry order identifier
Customer Name	Name of customer
Order Status	Current laundry status
Payment Status	Paid / Unpaid
